

Product features:

Material: Aluminum

Length:

Javelin weight: 800 gr

Product description:

Vinex Aero 800 gram aluminum training javelin

Throwing javelin, made of powder-coated aluminium, with steel tip and natural rope handle.

Characterized by **excellent balance**, this javelin **weighing 800 grams** is indicated in the technical regulations as a tool for the **senior and amateur men's categories**.

The aluminum with which it is made maintains solidity and elasticity allowing the tool to **maintain its trajectory during flight**, the natural rope handle **then improves the grip**, aiding measurement.
