

8 meter telescopic pole vault meter with direct reading

**Product features:**

Material: Aluminum

Accessories:

Height:

**Product description:**

**8 meter telescopic pole vault meter with direct reading**

Made of **aluminium** , this measurer is a **professional tool** for measuring the **height of the marker bar in pole vaulting**.

The meter has an **integrated metric roller with direct reading** , ranging from a **minimum of 135 cm to a maximum of 800 cm**.

For further **greater precision** , there is a "bubble" that allows you to **evaluate the degree of inclination of the surface** on which the meter is placed.

We provide a practical carrying case included.
