Product description:

The **volleyball system** with weighted base is functional for **playing volleyball**

The system is made up of a 270 cm **galvanized steel pole** with a 60 mm diameter, complete with a slide to adjust the height of the net .

The height of the bed base can be adjusted in seconds with the appropriate **sliding system** .

The system is self-supporting, but it is advisable to always fix it to the floor during the game, with the special pins supplied

The plant is also equipped with **comfortable wheels** to **facilitate its transport**.

Made in Italy product , entirely made in our factories
