

FC56H20 multisport scoreboard

Product features:

Product weight:
Certifications: UNI-EN 9554:1989
Warranty: 2 years
Dimensions:
Readability Corner:
Programmable team names: NO
Game time:
Team Score:
Period:
Time Out:
Acoustic signal: 120 db - 1 meter

Product description:

FC56H20 multisport electronic scoreboard

The FC56H20 **indoor scoreboard** can be used for multiple **sports** including **basketball** , **volleyball** , **table tennis** , **handball**, **five-a-side football** and many others.

With **dimensions of 140x33 cm** , it is particularly suitable for **school gyms and small sports halls** .

Despite the size, the **readability of the information** remains high, the scoreboard is equipped with **high definition LEDs** which, with a height of 20 cm, remain visible up to a **distance of 90 meters and a visibility angle of 150°**.

The electronic scoreboard, in this version, thanks to the particular Plexiglass front panel, does not require protection, as it is **resistant to ball hits** as per **DIN18032-3 and UNI 9554:1989 regulations**.

The scoreboard allows you to **view the main information during the match** , including the score, timeouts for each team and sets won or fouls committed by team. It also allows you to **view the stopwatch** , the period and **ball possession or service**. (via 1 light point for each team).

The basic equipment includes **wall brackets and plugs** which simplify installation.

Among the **greatest advantages** of the FC series is the possibility of being **remotely controlled** via the totally wireless **touchscreen console** (not included) , thus saving on installation costs.
