Product features:

Product weight:

Certifications: UNI-EN 9554:1989

Warranty: 2 years

Dimensions:

Readability Corner:

Programmable team names: NO

Game time:

Team Score:

Period:

Time Out:

Acoustic signal: 120 db - 1 meter

Product description:

FS100 multisport electronic scoreboard

The FS100 **indoor scoreboard** can be used for multiple **sports** including **basketball** , **volleyball** , **table tennis** , **handball**, **five-a-side football** and many others.

With a **size of 200x120 cm** , it is particularly suitable for installation in large **gyms and sports halls** .

Despite the size, the **readability of the information** remains high, the board is in fact equipped with **high definition LEDs** which, with a height of 30 cm, remain visible up to a **distance of 130 meters and a visibility angle of 150°**.

The electronic scoreboard, in this version, thanks to the particular Plexiglass front panel, does not require protection, as it is **resistant to ball hits** as per **DIN18032-3 and UNI 9554:1989 regulations**.

The Scoreboard allows you to **view the main information during the match** , including the score, timeouts for each team and sets won or fouls committed by team. It also allows you to **view the stopwatch** , the period and **ball possession or service**. (via 1 light point for each team).

The basic equipment includes **wall brackets and plugs** which simplify installation.

One of the advantages of the FS series is that it can be controlled via the **touchscreen console** (not included). It can also be used **wirelessly** by combining an **FS2 Radio Receiver** , thus saving on installation costs.
