### Product features:

Maximum User Capacity: 150 Kg

Console:

Dimensions Open:

Product weight:

Certifications: CE, ROHS, EN957

Warranty: 12 months for professional use

### Product description:

**C-AIR** is **DIAMOND** 's proposal for **exercise bikes** in which the effort is generated by the **air resistance** to the rotation of a paddle wheel.

The progenitor of all machines for high and very high impact **aerobic exercise** , it works without the aid of mains electricity, in full GREEN POWER logic.

**C-AIR** offers multiple possibilities for adjusting the position in the saddle, guaranteeing each user, regardless of size, an ergonomic and fully functional position for carrying out the exercise.

The **double transmission system** (chain/belt) synchronizes and makes synergistic the movements of the legs and arms which, however, can also be performed separately.

Suitable for users up to 150 kg, **C-AIR** allows the interface with a **heart rate monitor** strap (optional), guarantees maximum safety thanks to a very narrow mesh fan protection grille and maximum comfort thanks to the bulkhead that shields the flow of 'air.

Among the accessories supplied we find: **Bottle cage, Smartphone holder**
