Product description:

SKI AKTIVE by **DIAMOND** opens the door to the world of dedicated **training** protocols for **Nordic skiing** enthusiasts.

Characterized by the unmistakable "Y" shape of its frame, **SKI AKTIVE TRAINER** rests on a large wooden platform which makes it **self-supporting**.

Transferable on wheels, to also be placed **outdoors**, being completely independent from the electricity supply. Isolator tool by definition, it allows multiple **work combinations**, thanks also to the scalability of the **effort regulator** on 10 levels.

The ergonomic knobs replicate the grip of the **rackets typical of the specialty**, the movement of the upper limbs, duly accompanied by the rhythmic flexion of the legs, supports the user's progression from **warm-up** to post **-workout** cool-down.

All monitored through the easy and intuitive **display**, thanks to which you can view the functions of **Time, Distance, Calories, SPM, Rowing, Watts, Total rowing, Heart rate**.

It is equipped with a **wireless heart rate monitor receiver**
