Product description:

An expression of solidity and immediate functionality, **S53** by **DIAMOND** is characterized by a **trellis frame** treated and painted to be resistant to sweat and guarantee the user the ideal support to achieve their goals.

The S53 indoor bike features a **flywheel weighing 25 kg** , with **chain transmission** and central movement on bearings, guaranteeing fluidity and naturalness of the cycling gesture

The **fixed-gear pinion** offers a sensation of continuous traction that stimulates the user to increase their pace, improving their technical and athletic skills.

The micrometric effort adjustment pad, together with the flexibility of the quick fix system for positioning the saddle and handlebars offer comfort and ergonomics. The flywheel emergency brake, the "SPD" pedals and a "RACE" saddle complete the equipment of this **DIAMOND indoor bike**, on which it is possible to place two water bottles.

Strength and control at the service of the best training rooms.
