Product description:

The **DIAMOND 500 Series Leg Extension** is a machine aimed at isolating the **quadriceps femoris muscles** .

The machine has a **counterbalance** to eliminate the empty weight of the operating lever.

The possibility of loading the arms independently allows divergent and autonomous movements for **optimal biomechanics**.

Ergonomic backrest adjustable in multiple positions, like the push rollers, to adapt to all users.

High density foam padding, PU leather upholstery "for furniture". **2 disc holder pins** for easy and immediate storage.
Ergonomic handle for easy movement initiation.
