**Product description:**

Mat-Test mattress for measuring elevation and jump The perfect tool for measuring and training long jump and elevation!

**The Mat-Test Mattress** represents one of the **most useful tools for measuring the elevation, or length of a jump.**

Made of **sponge with a density of 21kg/m<sup>3</sup>, and covered in tear-proof PVC** , of which the lower part has **non-slip embossing** , it offers exceptional **cushioning** during the fall or strike phase.

The upper part has a **graduated print from 0 to 300 cm** and a 70 cm "starter" part with two prints imprinted.

The Mat-Test is also equipped with **two eyelets** that allow you to **position the mattress on the wall** , thus measuring **the athlete's elevation.**

This tool is perfect in every sporting field, especially volleyball, basketball and athletics.
