Product description:

The **DIAMOND abductor / adductor combo** is a dual-function machine designed to work the muscles of the **inner and outer thighs and the buttocks**.

The machine has a **starting angle adjustment system**, which can be activated via a lever located next to the seat, which determines which muscle group to train and which degree of opening to start from.

The machine features a support pad at knee height to ensure the correct position and superior comfort. **Magnetic Smart Pin** for load selection, also useful for blind people.

The combination of round and oval tubes together with the matt black sheet metal casing make the machine decidedly elegant. **Weight stack of 70 kg**.
