

## Chin Up - Dip Diamond Series 750

### Product features:

Maximum User Capacity: 160 Kg

Dimensions Open:

Product weight:

Warranty: 12 months for professional use

Weight pack:

### Product description:

The **DIAMOND 750 series Chin Up/Dip** assisted machine is a fundamental tool for the user's progression in the success of free body chin ups/dips. The support platform is practical and comfortable to use even for beginners and for those who want to develop their execution technique.

The **articulated handles** in the upper part where traction exercises are performed allow a natural movement defined by the user, thus providing a greater variety of muscular involvement.

The **multi-position handles in the central part**, where dips exercises are performed, allow the exercise to be varied with the possibility of training **both chest and triceps**.

**Alloy steel slide bars** that ensure smoother movements. End cap in anodized aluminum alloy which makes it even more resistant as well as giving it a decidedly more elegant look.

High density foam padding, PU leather upholstery "for furnishings" and **ABS protective casing**. Machining of aluminum pulleys with CNC process; the bearings are built with high quality material to withstand high intensities and for a long time.

**Coated metal cable with resistance capacity up to 1400 kg**
