Warranty: 12 months for professional use

Weight pack:

### Product description:

The **Dual Pulley Pro CCR-P** by **DIAMOND** is a solid and versatile machine, designed for use both in assisted and supervised contexts and in situations where the user can manage the **training without the presence of a trainer**.

The two weight columns are placed in the center of the machine, with a divergent angle, so as to be easily used even by **two athletes at the same time**.

The completely pivoting **pulleys** , adjustable in height, also allow isolation routines, supporting the most modern **functional training protocols**.

The available load, consisting of **20 metal tiles weighing 4.5 kg on each side** , satisfies the needs of users of various backgrounds, maintaining the immediacy of use and structural safety unchanged, thanks to the complete carterization of the weight packs.
