Product description:

The **DIAMOND 750 Series All In One** machine represents the maximum expression of the perfect multifunction station with which it will be possible to train any muscle group.

Designed to replace the most popular machines found in any commercial gym with the advantage of **saving space** without losing functionality.

This machine actually performs the functions of: **power rack, dual pulley, smith machine, high/low pulley, pull-up bar, disc rack**. The dual pulley has 20 adjustments.

The Smith Machine has a patented coupling/uncoupling device that facilitates use for the customer, furthermore the sliding is regulated both vertically and horizontally, so as to simulate unguided work following the biological and natural movement of the body.

8mm thick stainless steel hook plate. Olympic bar with load capacity over 300 kg, made of materials that guarantee long life and no deformation.
