

Transportable ballasted tennis system

Product features:

Finish: Powder-coated

Product weight:

Product description:

The outdoor tennis system , with ballast and wheels, is made of 8x8 cm square section **steel tubing** .

Complete with **net tension knob** with internal snap system, brass **rack** , **vertical rod with hook for net blocking** .

Green powder coating for exteriors.

This system is recommended for all **those fields where you do not want to have a permanent hole in the sockets** . Or in the case of traveling events.

The system is equipped with a **perforated plate at the base** , which allows semi-permanent anchoring.

The single pole of the system has a total weight of approximately 50 kg

In order to achieve **complete tension of the network** it is necessary to anchor the system to the ground using the fixing plate

Made in Italy product, entirely made in our factories.
