

Diamond Hexagonal Rubberized Handlebar

Product features:

Material: Acciaio e Gomma

Product weight:

Diametro Impugnatura: 28 mm

Product description:

Thanks to its design, the **Diamond Hexagonal Rubberized Dumbbell** allows you to expand the variety of exercises by strengthening the **muscles of the upper and lower parts of the body**.

The hexagonal ends of the Diamond dumbbell allow **good weight distribution** and can also act as a support base, ensuring high stability during training. Their shape guarantees their positioning on any surface as they do not tend to roll.

The handlebar is made of **quality rubber** which cushions falls. The knurled, ergonomic and non-slip handle of the Diamond dumbbells guarantees greater grip safety even with wet hands.

Diamond hex dumbbells **are sold individually and already assembled**.
