Product description:

Pair kit of electronic scoreboard with 24 second display + console

The **KIT24s** system was designed to display **ball possession time and time-out in basketball games**.

The current regulation provides that these times have the **value of 24/14 and 60 seconds respectively**.

It is composed of a **control unit equipped with a keyboard** and two electronic scoreboards

the figures have high visibility thanks to the high definition LEDs, with a size of 20 cm they can be visible up to 70 meters
