Product description:

Indoor case for semi-automatic defibrillator Case made for standard defibrillator, in galvanized P02 carbon steel sheet, with white powder coating (RAL9010)

Equipped with a windowed door, it allows you to **always keep the first aid device in sight** and check its correct functioning. This can be **closed using a padlockable seal**.

The case can be fixed to the wall using special holes.

Included in the package are the DAE sign and the SOS Vita sign.
