

Transportable Olympic Trellis Basketball System in galvanized steel - compliant with UNI-EN 1270

Product features:

Material: 2 mm thick steel

Finish: Zinc-coating

Certifications: Made according to UNI-EN 1270

Product description:

Transportable Olympic Trellis Basketball System in galvanized steel - compliant with UNI-EN 1270 Outdoor basketball facility, Olympic model with truss structure, ballast and wheels.

Made of galvanized steel, a finish that makes it **perfect for outdoor use, with 42mm diameter tubulars** , this basketball system has a basic **overhang of 225cm** (custom systems can be created upon customer request) and is accompanied by a **pair of bilaminate scoreboards**, 180x105 cm (in compliance with current FIBA regulations), **steel rims and nylon nets**.

The peculiarity of this system lies in its **mobility** , it is equipped with **4 wheels** , which retract using a special lever, once the system has been positioned, **and a ballast, essential for the stability of the structure**.

The system is basically **supplied with bilaminate backboards and standard hoops** , however a version with **plexiglass backboards and FIBA approved reclining hoops** is also available.

The entire system is produced in our factory and **complies with the UNI-EN 1270 standard**
