Finish: Powder-coated

Outer diameter:

### Product description:

Pair of Vertical Accident Prevention Protectors for Benches at the Edge of the Pitch for Coaches and Football Reserves Anti-shock protections are an indispensable element for pitchside benches mounted on football pitches.

These have the aim of **safeguarding the health of the players** , **avoiding injuries due to any accidental impact** with the benches located at the sides of the playing field.

**Required by the FIGC to obtain field approval**, they are **made of high-density sponge** with a diameter of 20 cm, and covered in double-layer, tear-proof, class 2 fireproof PVC.

Inside, a **powder-coated steel core** allows for practical attachment to the benches and maintains **their structural integrity**

The pair of protectors **can be mounted on all benches** , provided that they are specially prepared.

The protections can be **customized on request** with the sponsor's print or the team logo.

The colors available are Blue, Red, Green, Yellow and White.

**The cost indicated is for a pair of vertical protectors**, therefore useful for protecting the sides of a gaming bench.

**To complete the set, the bench can also be equipped with the GS0740 horizontal protections**
