

XT 260 River running kayak 1 seat

Product features:

Material: Polyethylene

Maximum User Capacity: 75 kg

Product weight:

Length:

Length:

Like Kayak: Fiume

Product description:

The **new XT260** is the little sister of the XT300. It reflects the same characteristics of **speed, agility in maneuvers, stability and gives the canoeist sensations of great ease of use.**

Furthermore, this kayak is suitable for both light weight paddlers and women. The new interiors of the XT260 are designed to give **considerable rigidity to the kayak**, creating a monolithic structure between the footrest, seat, central partitions and hull; this allowed a reduction in weight and a **notable improvement in the performance of the kayak.**

Equipment: four handles, two snap hook anchoring points, ergonomic seat with lateral thicknesses, adjustable anti-shatter footrest integrated into the front rib, polyethylene ribs, adjustable back rest, emptying cap.
