

SIX 340 kayak

#### Product features:

Material: Polyethylene

Maximum User Capacity: 100 Kg

Product weight:

Length:

Length:

Like Kayak: Fiume

#### Product description:

This **kayak** is designed for an advanced paddler looking for a technical hull capable of improving his performance in the most complex conditions and, mainly, in the most vertical and/or volume creeks.

The **Six** is the sixth EXO project based on **excellent engineering**. The semi-displacement type hull guarantees **soft landings even from high altitudes**, it is able to move in shallow water without disrupting the trajectories by coming into contact with the rocks, furthermore, its continuous rocker provides this boat with an "automatic" boof!
