

Freestyle XG Kayak

Product features:

Material: Polyethylene

Maximum User Capacity: 100 Kg

Product weight:

Length:

Length:

Like Kayak: Fluviale-Marino

Product description:

Freestyle to the nth degree with **Exo XG** : **safe fun and exciting performances** ! A **latest generation kayak dedicated to freestyle** , which is the **lightest** in its category... no other polyethylene playboat is lighter! This means greater elevation in the most complex figures, **incredible buoyancy ratio, ease and dynamism in control** .

The **Xg** has a **very high rotation speed** combined with the large hull surface for **constant and modular surfing** .

The marked rails help the initial insertion into the dynamics when performing your **tricks** , while the consistent side helps you "lean" laterally on the dynamics (wave or hole), keeping you at the center of the action. Even **in the most demanding conditions the Xg is reliable and predictable** ! So: **whether you are in a man-made spot, a giant wave in a volume river or on the coast at your favorite surf spot, this is the kayak to "play" with!**

The equipment includes an ergonomic seat, multi-layer foam footrest kit, ExoThrust cover, furthermore the backrest position is adjustable using two cleats. Available in single-layer or double-layer version.

For the design of the new Freestyle kayak Exo collaborated with the young and dynamic group of Italian Freestylers of KriminalKayak.
