

K1D DESCENT kayak

Product features:

Material: Polyethylene

Maximum User Capacity: 100 Kg

Product weight:

Length:

Length:

Like Kayak: Fiume

Product description:

This is the first **polyethylene K1 Downhill** designed specifically for **youth river activity**. **The low side, the reduced volumes, the rounded bottom combined with the sturdiness and safety of this kayak make it the ideal companion for very young paddlers.**

The **low cost** and **extraordinary resistance** make it the suitable tool for clubs that invest their resources in the development of this discipline.
