

Mesh sheet to stop balls for fencing sports fields, 130 mm mesh - wire Ø mm. 3.5

Product features:

Material: HD polyethylene

Product weight:

Wire diameter: 3,5 mm

Sweater: Knotted square 130 mm

Product description:

Protection sheet, fence and cover for sports fields.

Made with **high density polyethylene thread** , with a **diameter of 3.5 mm** , it is used to prevent the ball from leaving the playing field.

In particular, this sheet with a **130x130 mm square mesh** is suitable for **installation on football, five-a-side, volleyball and beach volleyball fields.**

Despite having a thickness of 3.5 mm, the **knotted thread** has a **high breaking load** , allowing the sheet to resist stress not only due to play, but also to atmospheric agents.

This type of ball net, with a thickness of 3.5 mm, is recommended for lateral protection of the pitch.

The sheet is supplied complete with a reinforcing "edging" cord on the long sides , useful for greater stability and easier laying of the sheet **in the versions with a height of 3/3.50/4/5/6/8 metres. For different sizes the edging is not included.**

The cover is made to measure, as indicated by the customer.

The cost indicated is per square meter.
