

Mesh sheet to stop balls for fencing sports fields, 100 mm mesh - wire Ø mm. 3 fireproof

Product features:

Material: HT polypropylene

Product weight:

Certifications: FIREPROOF

Wire diameter: 3,0 mm

Sweater: Knotless square 100 mm

Product description:

Protection sheet, fence and cover for sports fields.

Made with a **high tenacity fireproof polypropylene thread** , with a **diameter of 3 mm** , it is used to prevent the ball from leaving the playing field.

In particular, this sheet with a **100x100 mm square mesh** is suitable for **installation on football, five-a-side, volleyball and beach volleyball fields.**

Despite having a thickness of 3 mm, the **thread** has a **high breaking load** , allowing the sheet to resist stress not only due to play, but also to atmospheric agents.

This type of ball net, with a thickness of 3 mm and a weight of 60 g/m2, is recommended not only for the lateral protection of the pitch but also as a sky covering.

The cover is made to measure, as indicated by the customer (minimum order 10m²)

This knotless version is supplied complete with the perimeter reinforcement cord.

The cost indicated is per square meter.
