

Netting to stop balls for fencing sports fields, 45 mm mesh without knots - wire Ø mm. 2

Product features:

Material: HD polyethylene

Wire diameter: 2,0 mm

Sweater: Square without knot 45 mm

Product description:

Protection sheet, fence and cover for sports fields.

Made with **high density polyethylene wire** , with a **diameter of 2 mm** , it is used to prevent the balls from escaping from the playing field.

In particular, this sheet with a **45x45 mm square mesh** is suitable for **installation on tennis and beach tennis courts.**

Despite having a thickness of 2 mm, the **thread** has a **high breaking load** , allowing the sheet to resist stress not only due to play, but also to atmospheric agents.

This type of net is recommended for lateral protection of the pitch.

For knotless nets, it is essential to purchase the reinforcing perimeter edging to avoid fraying of the net sheet.

The cover is made to measure, as indicated by the customer.

The cost indicated is per square meter.
