

Reinforcement perimeter edging for ball-holding net sheet and ball holder

Product features:

Material: HD polyethylene

Product weight:

Wire diameter: 6,00 mm

Product description:

This is an **accessory to be purchased together with the customized net sheet** . It is a **6 mm thick cord** that is added to the net sheet, **along the entire perimeter** . It has the function of **improving the tightness and durability of the net sheet over time** .

Finishing with reinforcement function consisting of twisted **polyethylene rope with a diameter of mm. 6** fixed every 3/4mm directly to the mesh sheet with multiple thread tubular stitching.

Price is per linear metre, therefore it will be necessary to add to the cart as many meters as are needed to finish the cloth.

For example, when purchasing a 10x5 meter sheet you will have to add 30 meters of edging.

The color of the border will be the same as the netting.
