Information:

Product description:

Stepper Toorx Force is an extremely practical and functional home exercise stepper , excellent for performing cardio exercises and quickly burning fat.

The stepper is equipped with *two hydraulic pistons* resistant to stress, furthermore the **LCD display** provides all the information necessary to monitor the effectiveness of the training.

The effort adjustment on 12 levels occurs mechanically by acting on both ring nuts located above the hydraulic pistons.

Simply rotate the ring nuts and follow the numbers printed on the circumference of the pistons to apply the desired degree of resistance.

The handlebar is ergonomic and in addition to offering valid support, it has the hand pulse function to monitor heartbeats. A practical bottle holder is installed on the central frame (bottle not included), so you can quench your thirst without interrupting your physical activity. Toorx Stepper Force is solid and robust and supports a weight of up to 120 kg.

Thanks to its small size, the stepper is foldable and can be stored in a small space.
