Product description:

The Everfit Msk-500 multifunction station is the brand new Entry Level product from the Everfit brand, it represents an absolute novelty and is equipped with very good features at a truly excellent price!

It is built with **reinforced steel tubing with a 45 x 45 mm square section with double, scratch-resistant epoxy powder painting** and the structure has a total weight of 89 kg.

The brand new Everfit MSK 500 station has a **ball bearing pulley and pulley system** and is equipped with solid **polyurethane-coated braided steel cables**.

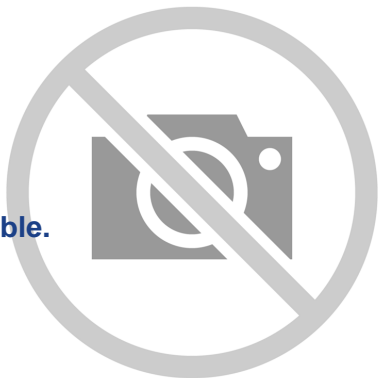

The **weight pack supplied is 45 kg** ; included in the offer we can already find the **triceps bar and ankle brace for chin-ups**.

Another strong point of the **Everfit MSK 500 station** is its **size, very small** and therefore perfect for mounting at home without taking up too much space; despite its small size, it still allows you to carry out **multiple exercises to tone and increase muscle mass in multiple parts** of the body:

Triceps, Abdominal Crunch, Leg Extension, High Pull Ab Crunch, Tricep Push-down, Lat Pull Down, Biceps, Pectoral Fly, Front Press, Leg Kick Back, Seated shoulder Press, Upright Row, Standing Leg Curl, **Arm Curl**.

The novelty of this model is the presence of the **Arm Curl** to be able to carry out targeted exercises to strengthen the arms.

The ankle **locking and leg extension rollers** are made of **high-density foam with eco-leather covering, very soft**

and comfortable.
