#### **Product description:**

**The Toorx Msx-60 is a multifunction station** made with great construction quality and high performance.

The **structure of the multifunction station has a weight of 134 kg** , with **reinforced steel tubing with a 50 x 70 mm rectangular section** , double epoxy powder painting, scratch-resistant.

The MSX 60 is built to allow training in complete safety thanks to the **polyurethane-coated braided steel cable system, with a breaking load of 2000 kg.**

The multifunction station will offer very fluid movement, thanks to the system of pulleys and pulleys with ball bearings.

It is supplied with **a 70 kg weight pack with lateral protection guard** , we also have a handle and ankle support for chin-ups.

The main exercises performed on the MSX 60 multifunction station concern the following muscle areas:

Chest: bench press, rowing machine, butterfly, front press

Legs (legs): leg extension and leg curl

Arms and shoulders: single triceps inverse, double triceps, biceps, shoulder press

Back: Pectoral inverse, lat machine back, lat pull down, seated pulley row

**Characteristics:**

- Maximum front press weight 91 kg
- Maximum butterfly weight 36x2 Kg
- Maximum lat pull weight 73 kg
- Maximum low pulley weight 73 kg
- 70 kg weight pack with lateral protection guard
- Horizontal leg extension adjustment on 4 levels
- Vertical butterfly adjustment 880/970 - horizontal 750/820
- Pulley and pulley system with ball bearings
- Polyurethane coated braided steel cable system. Breaking load 2000 kg
