Product description:

The **Toorx Csx-70 Multifunction Station and Cable Cross** has a weight of **159 kg** , with reinforced steel tubing with a section of **73 x 30 mm** and **80 x 40 mm**, double epoxy powder painting, scratch-resistant.

It has a system of **braided steel cables coated in polyurethane**, with a breaking load of **2000 kg**.

The Toorx CSX 70 station will offer a very fluid movement, thanks to the **system of pulleys and pulleys with ball bearings**.

The **weight stack** is made up of **2 50 kg** columns with micromesh lateral protection guards.

We are supplied with a pair of pulley handles and a chin-up anklet.
