Product description:

Squat Stand Toorx Wlx 50 is made entirely of reinforced steel tubes with a 50x50x1.5mm square section while the front and rear stabilizers are 60x60x1.5mm.

The height is adjustable from 620/1520mm on 10 levels via solid chromed steel stops with safety devices.

The sturdiness of the structure gives considerable safety and stability even in the presence of significant weight loads, in fact the **maximum weight load allowed is 200Kg**.

The distance of the supports is 890 mm, it is suitable for rockers of 120 cm or more
