Product description:

The Toorx WLX 3600 station is the only Power Rack in the line, suitable for intensive use also for gyms, Crossfit centers, hotels, holiday farms, etc.

It has a very solid structure, weighing 132 kg, made up of double-layer scratch-resistant epoxy powder painted tubulars in solid steel with a square section of 75 x 75 x 3.2 mm.

It features 25 vertically positioned holes to attach the J-Cup. The J-Hook attachment is adjustable in height from 45 cm up to 189 cm, the distance between the holes is 60 mm.

The J-Cup and spotting arm is extra strong, with a thickness of 6 mm and UHMW (Ultra High Molecular Weight) protection.
