Product description:

Ideal for every member of the family, **Total Body Squat** from the Toorx line allows you to train many parts of the body simultaneously! While the glutes, thighs and calves strengthen, the abdominals contract, along with the biceps, pectorals and lats. The end result is that the whole body tones up, burns fat and loses weight at the same time.

 Complete with console with LCD display showing the following information: repetitions/minute, time display, calorie counter, scan.
