

Column Utilbasket with height-adjustable basket and net

Product features:

Material: 2 mm thick steel

Finish: Powder-coated

Accessories:

Product description:

The Utilibasket is a transportable basket frequently used for **beginners in basketball**.

The base of the structure is made of **powder-coated tubular steel** , while the sliding part that allows **the height to be adjusted** , from a minimum of **200 cm to a maximum of 300** , is produced in **galvanized steel** , to withstand greater stress and wear.

This **basketball hoop** does not have the classic backboard, making it perfect for teaching basketball as it can be used from any position, making it easier to **visualize the hoop** and **promoting shooting precision** .

The Utilibasket is equipped with a **nylon net** , while accident prevention protection is optional.
