Product description:

The **JK 6060 multifunction bench** is a versatile tool that allows you to carry out various workouts comfortably at home.

The structure is very **solid** and **robust** , made up of 50 x 50 mm square tubing that can support a user with a maximum weight of 130 kg.

The bench is equipped with an excellent barbell holder to support loads of **up to 100 kg** .

Thanks to this bench the training possibilities will be numerous and varied.

The **backrest** is adjustable in two different positions and has 40 mm thick padding.

With the **JK 6060 bench** you can **perform various exercises** such as the bench press, the butterfly, thanks to the special handles, the leg curl, led extension.
