Roller diameter:

Maximum User Capacity: 140 Kg

Heart Rate Detection:

Dimensions Open:

Dimensions Closed:

Packaging dimensions:

Product weight:

Weight of the packaged product:

Certifications: CE, ROHS, EN957

Warranty: 2 years

Product description:

The **Jk 157 treadmill** is characterized by a refined design and high-level performance.

Equipped with a powerful **3.5 HP motor with continuous power peaking at 5 HP**. It allows you to reach a **maximum speed of 22 km/h** , starting from a minimum of 0.8 km/h with 3 preset speeds and is adjustable in increments in steps of 0.1 km/h.

Equipped with **electronic inclination** , the inclination of the platform can be adjusted via the appropriate buttons on **20 different levels, 3 preset steps**.

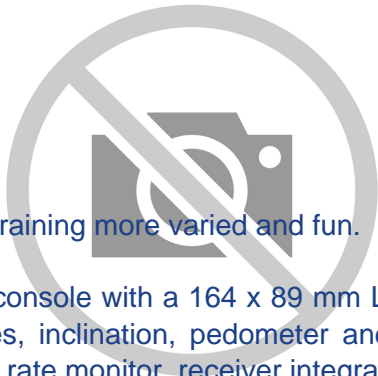

The running surface has a surface area of 51 x 140 cm and the running belt is non-slip on double-weave cotton canvas, 1.6 mm thick.

It has a shock-absorbing system of **4 elastomers with springs and 4 standard elastomers** that manage to absorb a good percentage of impact on the platform.

The **diameter of the rollers** of the Jk Fitness 157 is **50 mm for the front roller and 46 mm for the rear one**.

Features MP3 input with audio speakers, USB for charging your devices and Bluetooth system for FitShow app + 2 water bottle holders.

The model is compatible with **the Zwift App** which allows you to run on more than 100,000 km of geolocalized videos all over the world and **Kinomap fitness** which allows you to race on various routes with multiple users at the same

time to make training more varied and fun.

It features a console with a 164 x 89 mm LCD window + 2 white LED windows, where you can view time, distance, speed, calories, inclination, pedometer and pulse, detected thanks to the manual hand pulse sensors or via the included heart rate monitor, receiver integrated wireless.

The Jk 157 has many programs available: **12 presets** with automatic speed and inclination variation, **1 HRC program and body fat test**.

The treadmill can be **closed** thanks to the servo-assisted closing via hydraulic piston and can be moved using the wheels on the base.
