Product description:

The **Indoor Cycle belt drive Jk 556** is a **bike for home use** with a **22 kg flywheel with fixed sprocket**.

The soft race **saddle** , adjustable vertically on 8 levels (2.5 cm steps) and horizontally micrometrically.

The **handlebar** is ergonomic, multi-grip, adjustable vertically and horizontally micrometrically.

It has a pad braking system and micrometric inertia adjustment.

It has a **structure weighing 51 kg** and can support a user with a **maximum weight of 150 kg**.

The bike has a **wireless LCD screen console** that shows time/speed/distance/calories/RPM/pulse.

Heart rate measurement is done via an integrated wireless heart rate receiver with heart rate monitor.

The **resistance is manually adjustable** using the appropriate knob which acts on the brake via the side pads.
