**Product description:**

The **Garlando F-5 table football with extending rods** is made with quality materials and with great attention to detail and offers innovative solutions.

The **MDF cabinet** with melamine covering and cherry color has a thickness of 16 mm. The **sturdy square MDF legs** (9 x 9 cm) with black melamine covering are made even more stable by the chromed reinforcement bars (diameter 38 mm).

MDF **playing field** with melamine covering. The particular "grass" effect with silk-screened white lines reproduces the stadium ground. The raised corners allow a correct return of the ball into play.

**Outgoing rods** with a diameter of 13 mm in solid iron with three-coloured rubber shock absorber players. The ends of the rods are covered by plastic protections for greater safety.

Scoring goals is easier and more fun thanks to the **goalkeeper who rotates on himself**.

Simple and immediate **recovery** of balls into goals from two portholes located behind the headers.

2 white-black soccer ball effect balls supplied.

**This table football maintains an excellent quality/price ratio**
