

Table football Garlando Image with outgoing rods

Product features:

Material: MDF (Medium Density Fiberboard)

Packaging dimensions:

Product weight:

Table football auctions: Aste Uscenti

Product description:

The **Garlando Image table football with protruding rods** reveals a robust structure created by overlapping different materials such as glass, metal and reflective surfaces in an original way.

The **MDF cabinet** with melamine covering has a thickness of 2.5 cm which gives the structure excellent robustness. Mirror surface with silver edges.

Equipped with **elegant fibreglass-reinforced HDP legs** , angled for perfect stability on the ground.

The adjustable **feet** allow you to always have a perfectly level playing field even on non-linear floors.

The **rods** have a diameter of 16 mm, in drawn steel, with high resistance to torsion and anti-rust chrome plating. The quality of the material used, together with the thickness of 2.2 millimetres, prevents the temples from bending, maintaining a perfect shape for a long time.

The standard supplied rods protrude from the cabinet - on the side opposite the knob - according to the standard used in Italy and in international competitions.

Safety device for the rods (telescopic rods): upon request it is possible to supply the table football with telescopic safety rods to replace the outgoing ones. Made of the same material and with the same technical characteristics as the outgoing ones, they differ in their operation, which ensures the maximum level of safety.

In **telescopic rods**, a smaller diameter rod slides inside the rod with the players, the end of which reenters the furniture without coming out, thus avoiding the risk of hitting children's faces and eyes.

The **rods** are fixed to the furniture using nylon bushings.

The steel **ball bearings** inside the bushings significantly improve the smoothness of the shafts: it increases the speed, and therefore the pleasantness, of the game, while reducing the stress on the players' wrists.

Single-colored **figures** in plastic material (moplen) representing a stylized human figure, fixed to the rods with direct molding: they do not move, they do not move, they maintain their position perfectly. Team colours: red and blue.

Silver plastic **knobs** with wenge wood inserts, for a more pleasant grip.

The **playing field** is made of tempered glass (5 mm thick) with a white background and gray lines.

Insertion of balls onto the pitch via **two nozzles on the sides of the table football** .

The recovery of the balls in the goal, simple and immediate, occurs manually through two portholes located behind the goals.

Abacus scoreboard, with cubes in colors coordinated with the little men.

This table football maintains an excellent quality/price ratio
