

Garlando G-500 Evolution table football with retractable rods

Product features:

Material: MDF (Medium Density Fiberboard)

Packaging dimensions:

Product weight:

Table football auctions: Aste Rientranti

Product description:

The **Garlando G-500 Evolution table football** with retractable rods stands out from the beech model for the elegant black and silver combination with the logo that stands out on the furniture, the standard adjustable feet and the ergonomic knobs, for an ideal grip.

The **MDF cabinet** has a black melamine covering with silver edging and silk-screen printing and a thickness of 2.5 cm.

The **legs** are made of metal with silver powder coating. The considerable dimensions (9 x 9 cm) guarantee the necessary stability on the ground.

The adjustable feet for a perfectly level playing field.

The **rods** have a diameter of 16 mm, in drawn steel, with high resistance to torsion and anti-rust chrome plating. The quality of the material used, together with the thickness of 2.2 millimetres, prevents the temples from bending, maintaining a perfect shape for a long time.

The standard supplied rods protrude from the cabinet on the side opposite the knob.

Safety device for the rods (telescopic rods): upon request it is possible to supply the table football with telescopic safety rods to replace the outgoing ones. Made of the same material and with the same technical characteristics as the outgoing ones, they differ in their operation, which ensures the maximum level of safety.

In **telescopic rods**, a smaller diameter rod slides inside the rod with the players, the end of which reenters the

furniture without coming out, thus avoiding the risk of hitting children's faces and eyes.

The rods are fixed to the furniture using nylon bushings.

Single-colored **figures** in plastic material (moplen) representing a stylized human figure, fixed to the rods with direct molding: they do not move, they do not move, they maintain their position perfectly. Team colours: red and blue.

Plastic knobs with ergonomic grip.

The steel **ball bearings** inside the bushings significantly improve the smoothness of the shafts: it increases the speed, and therefore the pleasantness, of the game, while reducing the stress on the players' wrists.

The **playing field** is made of tempered glass (5 mm thick) with a grass green background and white lines that reproduce the stadium ground.

Insertion of balls onto the pitch via **two outlets on the sides of the table football table** .

The recovery of the balls in the goal, simple and immediate, occurs manually through an opening on one side of the table football with aluminum finish.

Cubed plastic scorecard , in colors coordinated with the little men.

Supplied with 10 white Standard model balls

This table football maintains an excellent quality/price ratio
