

Garlando Foldy Evolution table football with protruding rods and folding legs

Product features:

Material: MDF (Medium Density Fiberboard)

Packaging dimensions:

Product weight:

Table football auctions: Aste Uscenti

Product description:

The **Garlando Foldy Evolution table football with protruding rods** is characterized by the elegant black and silver combination with little men in the classic red and blue. Ideal for all environments where there is no possibility of dedicating a special space to the table football table, it can be stored comfortably.

The **MDF furniture** has a melamine coating and a thickness of 2.5 cm which gives the structure considerable sturdiness. Four protective rubbers affixed to the furniture allow for easier and safer resting on the ground when the table football table is brought into a vertical position to fold the legs. The wheels (on the same side as the rubber pads) allow it to be moved after the legs have been folded.

The **legs** are made of MDF with melamine coating and are 4 cm thick to give the table football the necessary stability. The legs fold to the sides of the furniture.

Adjustable **feet** as standard for a perfectly level playing field.

Safety device for the rods (telescopic rods): upon request it is possible to supply the table football with telescopic safety rods to replace the outgoing ones. Made of the same material and with the same technical characteristics as the outgoing ones, they differ in their operation, which ensures the maximum level of safety.

In **telescopic rods**, a smaller diameter rod slides inside the rod with the players, the end of which reenters the furniture without coming out, thus avoiding the risk of hitting children's faces and eyes.

The rods are fixed to the furniture using nylon bushings.

Single-colored **figures** in plastic material (moplen) representing a stylized human figure, fixed to the rods molding: they do not move, they do not move, they maintain their position perfectly. Team colours: red and blue.

The steel **ball bearings** inside the bushings significantly improve the smoothness of the shafts: it increases the speed, and therefore the pleasantness, of the game, while reducing the stress on the players' wrists.

Silver plastic **knobs** for a more pleasant grip.

The **playing field** is made of tempered glass with a white background and gray lines.

Insertion of balls onto the pitch via **two outlets on the sides of the table football table** .

The recovery of the balls in the goal, simple and immediate, occurs manually through two portholes located behind the goals.

Plastic **scoreboard** cubes, in colors coordinated with the little men.

Supplied with 10 white Standard model balls

This table football maintains an excellent quality/price ratio
