Product description:

The Garlando Special Champion table football with retractable rods is designed for those who use wheelchairs.

Eliminate the inconveniences of playing table football on a wheelchair. Special Champion, the table football table designed specifically for wheelchair users.

The **MDF cabinet** with melamine coating whose thickness of 2.5 centimeters provides excellent robustness. Color: black with silver screen printing.

The ITSF approved version has the ITSF logo and official plaque with Competition registration certificate with serial number.

The metal legs with silver powder coating. The considerable dimensions (9 x 9 cm) guarantee the necessary stability on the ground.

Adjustable competition **feet** for a perfectly level playing field.

The **rods** have a diameter of 16 mm, in drawn steel, with high resistance to torsion and anti-rust chrome plating. The quality of the material used, together with the 2 millimeter thickness, prevents the temples from bending, maintaining a perfect shape for a long time.

Safety device for the rods (telescopic rods): upon request it is possible to supply the table football with telescopic safety rods to replace the outgoing ones. Made of the same material and with the same technical characteristics as the outgoing ones, they differ in their operation, which ensures the maximum level of safety.

The rods diameter mm. 16 in high torsion-resistant drawn steel with anti-rust chrome plating. The quality of the material used, together with the thickness of 2.2 millimetres, prevents the temples from bending, maintaining a perfect shape for a long time.

Telescopic rods as standard for greater safety. A smaller diameter rod slides inside the rod with the players, the end of which reenters the cabinet without coming out.

The rods are fixed to the furniture using nylon bushings.

The ITSF version has, in place of the springs, rubber pads (21mm long) of new design and compound, for better shock absorption. Spacers on the goalkeeper's rod keep the player within the range of action of the goal.

The steel ball bearings inside the bushings significantly improve the smoothness of the shafts: they increase the speed and pleasure of the game, reducing stress on the players' wrists.

Single-colored **figures** in plastic material (moplen) representing a stylized human figure, fixed to the rods with direct molding: they do not move, they do not move, they maintain their position perfectly. Team colours: red and blue.

On the ITSF version the goalkeeper performs a complete rotation on himself.

Plastic knobs with ergonomic grip.

The steel **ball bearings** inside the bushings significantly improve the smoothness of the shafts: it increases the speed, and therefore the pleasantness, of the game, while reducing the stress on the players' wrists.

Internal door in plastic laminate with sliding mechanism to cushion the impact of the ball and prevent balls in the goal from bouncing out.

The **playing field** is made of tempered glass (5 mm thick) with a grass green background and white lines that reproduce the stadium ground.

Simple and immediate **recovery of balls** in the goal from two ball exits in correspondence with the legs.

Tournament scoreboard with indication of game sets and goals conveniently located on the edge of each header.

10 Standard white balls supplied with each table football table.

This table football maintains an excellent quality/price ratio
