

Garlando Master champion table football with outgoing rods and long playing field

Product features:

Material: MDF (Medium Density Fiberboard)

Packaging dimensions:

Product weight:

Table football auctions: Aste Uscenti

Playing field:

Product description:

The Garlando Master champion table football **with outgoing rods**, an official ITSF table football that can be used in international competitions in the International, Master Series and Pro Tour categories, Master Champion is the version without a coin mechanism of the famous World Champion.

Cabinet in multilayer plywood covered in plastic laminate with aluminum edges. The resistance of the materials used and the 3 centimeter thickness make the structure extremely robust.

Color: black with ITSF logo and official plaque.

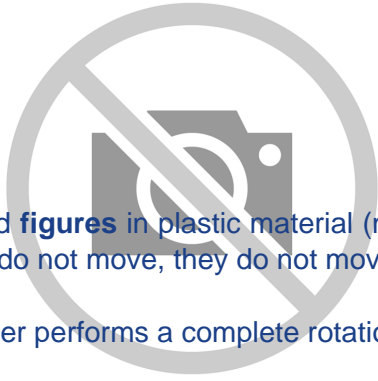

The square **legs** (9 x 9 cm) in MDF are 15 mm thick with melamine coating, silver colour. The considerable dimensions guarantee the necessary stability on the ground.

Outgoing rods diameter mm. 16 in high resistance steel with anti-rust chrome plating. The thickness of mm. 3 increases torsional resistance by 50% compared to traditional temples, preventing them from bending: the temples maintain a perfect shape for a long time even after prolonged use. **This model is NOT available with retractable rods (safety telescopic).**

On the goalkeeper's **rod** there is a rubber spacer that keeps the little man within the range of action of the goal.

New type **bushings** with steel ball bearings for high smoothness of the shafts: notable playing speed, less stress on the players' wrists.

To replace the rubber springs (21mm long) of new design and compound, for better shock absorption.

Single-colored **figures** in plastic material (moplen) representing a stylized human figure, fixed to the rods with direct molding: they do not move, they do not move, they maintain their position perfectly. Team colours: red and blue.

The goalkeeper performs a complete rotation on himself.

Knobs with wooden inserts, for a more pleasant grip.

Internal door in plastic laminate with sliding mechanism to cushion the impact of the ball and prevent balls in the goal from bouncing out.

External goal in HDP (high density polymer) reinforced with glass fiber with an innovative shaped profile to prevent irregular ball trajectories.

Insertion of balls onto the pitch via two outlets on the sides of the table football table.

Playing surface in sandblasted tempered glass with green background and white lines reproducing the stadium pitch.

Simple and immediate **recovery** of balls into goals from two portholes on the sides of the cabinet.

Tournament scoreboard with indication of game sets and goals.

3 Speed Control balls supplied.

This table football maintains an excellent quality/price ratio
