Garlando Master Pro Weatherproof Table Football with extending rods and folding legs

Product features:

Material: 3 cm multilayer plywood
Packaging dimensions:
Product weight:
Table football auctions: Aste Uscenti
Playing field:

Product description:

The Garlando Master Pro Weatherproof table football with protruding rods is characterized by the sturdiness of the legs and the possibility of folding the legs to store it inside.

The **cabinet** is made of multilayer marine plywood covered in plastic laminate, water resistant and glued together with a special non-water-soluble glue, with a thickness of mm. 20

The legs are made of metal with powder coating, water resistant. They fold easily under the furniture. This model does not provide the possibility of installing adjustable feet.

The **rods,** with diameter mm. 16 in steel and 2 mm thick, they are made of high-resistance drawn wire with special triple-layer anti-rust chrome plating.

Safety device for the rods (telescopic rods): upon request it is possible to supply the table football with telescopic safety rods to replace the outgoing ones. Made of the same material and with the same technical characteristics as the outgoing ones, they differ in their operation, which ensures the maximum level of safety.

In **telescopic rods,** a smaller diameter rod slides inside the rod with the players, the end of which reenters the furniture without coming out, thus avoiding the risk of hitting children's faces and eyes.

The rods are fixed to the furniture using nylon bushings.

Single-colored **figures** in plastic material (moplen) representing a stylized human figure, fixed to the rods with direct molding: they do not move, they do not move, they maintain their position perfectly. Team colours: red and blue.

The ball bearings are made of stainless steel for high smoothness of the shafts: notable playing speed and less stress on the players' wrists.

The playing **field** is made of plastic laminate glued on the base with special non-water-soluble glues with a green grass background and white lines that reproduce the stadium ground.

Insertion of balls onto the pitch via **two outlets on the sides of the table football table** .

The recovery of the balls in the goal, simple and immediate, occurs manually through two portholes.

Cubed plastic **scorecards** in colors coordinated with the little men.

Supplied with 10 white Standard model balls

This table football maintains an excellent quality/price ratio
