

Garlando Deluxe outdoor football table with retractable rods

Product features:

Material: 3 cm multilayer plywood

Packaging dimensions:

Product weight:

Table football auctions: Aste Rientranti

Playing field:

Product description:

The Garlando Deluxe table football with retractable rods is able to withstand the roughest treatments. The model produced for the Italian market is covered in the characteristic dark gray with a light gray central band that lovers of the genre and frequenters of arcades well recognize and which has made it a timeless classic.

The **cabinet** is constructed of multilayer plywood and covered in plastic laminate, both water-resistant and glued together with a special non-water-soluble glue. The robustness of the materials used and the thickness of 3 centimeters, which reaches 3.6 cm in the central band, make the structure extremely resistant. It has an iridescent blue top and bottom band and an iridescent light blue middle band.

The structure of the furniture is assembled by means of a system of metal hinges secured by screws and bolts, without the use of glues which would make it difficult to replace parts.

The legs are in epoxy powder painted metal. The considerable dimensions (9 x 9 cm) guarantee maximum stability on the ground. Possibility of installing adjustable feet to level the playing surface on uneven terrain.

The **rods**, with diameter mm. 16 in steel, they are high-resistance drawn with special anti-rust chrome plating. The quality of the material used, together with the thickness of 2.2 millimetres, prevents the temples from bending, maintaining a perfect shape for a long time. The choice between outgoing and retracting (telescopic) rods is allowed.

The special triple-layer chrome plating to which both the outgoing rods and the telescopic safety rods are subjected combats the formation of rust even after years in which the table football table is subjected to the elements.

Safety device for the rods (telescopic rods): upon request it is possible to supply the table football with telescopic

safety rods to replace the outgoing ones. Made of the same material and with the same technical characteristics as the outgoing ones, they differ in their operation, which ensures the maximum level of safety.

In **telescopic rods**, a smaller diameter rod slides inside the rod with the players, the end of which reenters the furniture without coming out, thus avoiding the risk of hitting children's faces and eyes.

The rods are fixed to the furniture by means of nylon flanges containing a ball bearing.

Single-colored **figures** in plastic material (moplen) representing a stylized human figure, fixed to the rods with direct molding: they do not move, they do not move, they maintain their position perfectly. Team colours: red / blue.

The steel **ball bearings** inside the bushings significantly improve the smoothness of the shafts: it increases the speed, and therefore the pleasantness, of the game, while reducing the stress on the players' wrists.

The playing **field** is made of tempered glass with a grass green background and white lines that reproduce the stadium ground, made by firing at 800 degrees (they do not fade in the sun and are not afraid of humidity).

Abacus scoreboard, with cubes in colors coordinated with the little men.

Insertion of balls onto the pitch via a nozzle on one side of the table football table. The outside of the goals is covered in aluzinc, a very robust aluminum and zinc alloy that prevents the formation of dents even after numerous matches.

Furthermore, it is possible to open the cabinet to access its interior. A metal support is automatically activated to support the upper part of the football table when it is raised, allowing you to carry out the necessary operations in complete safety.

With the cabinet open, the playing field can be separated from the upper part of the cabinet by opening two latches, to facilitate cleaning and the possible replacement of parts. The internal mechanism for sliding the balls is made up of individually replaceable metal elements.

The **drink holders** (on both sides of the cabinet) for storing glasses, bottles and cans complete the range of accessories of this model.

Deluxe Outdoor is equipped as standard with a mechanical pull coin acceptor, adjustable for any type of coin or token, which releases all the balls at the same time. The following mechanical coin acceptor options are available upon request: coin acceptor with match counter, coin acceptor with protected match counter, coin acceptor with protected match counter and ejector.

Deluxe Outdoor can also be supplied with the coin mechanism disabled for free play.

Supplied with 10 white Standard model balls.

This table football maintains an excellent quality/price ratio
