Plane thickness: 16 mm

Product description:

The Garlando Progress Indoor table tennis with wheels is an indoor model, foldable with compact automatic closing, with green playing surface, it is suitable for family use and amateur play.

The **structure** of the playing surface is made of wood agglomerate with melamine coating (16 mm thick), with indelible white lines and anti-reflective finish.

Permanent net and net tensioners are supplied, it is not necessary to dismantle them to fold the table.

Frame and legs : tubular metal structure diameter mm. 25, with powder coating. Ball holder included.

The four double wheels (diameter 125 mm), two of which rotate 360°, facilitate movement when the table is folded.
