Product description:

The Garlando Advance Outdoor table tennis with wheels is an outdoor model, foldable with compact automatic closure, blue playing surface, with tournament regulation measurements, and is suitable for recreational use and training.

Equipped with an **SMS (Smart Manual System) unlocking system** via a knob located under the tops, visible from any position of the table, including the sides. The bar under the table unlocks both safety devices at the same time.

The **structure** of the playing surface is made of stratified resin with a thickness of mm. 4, edging with sturdy metal profile mm. 36, indelible white lines, anti-reflective finish.

Racket and ball holder included.

Frame and legs : powder-coated tubular metal structure, with legs with a diameter of mm. 25 and horizontal connection bars for high stability.

Permanent **net and tensioners** supplied, it is not necessary to dismantle them to fold the table.

The four double **wheels** (diameter 125 mm), two of which rotate 360°, facilitate movement when the table is folded.
